Modern Alchemists brings “Vibes” to Microsoft Windows 10

LINZ, AUSTRIA - July 4th, 2016 - Modern Alchemists announced the release of “Vibes”, its popular casual mobile and desktop game, on the Microsoft Universal Windows Platform (UWP).

From now on, players of Modern Alchemists' games on the Windows platform will benefit from more frequent content updates, thanks to the simplified development and deployment process of the Universal Windows Platform:

“After the success we have seen with Windows Store 8.1, there was no discussion, whether or not to bring our games to the Universal Windows Platform (UWP). Thanks to the great tools and not less, the great support at Microsoft, this task was accomplished in no time.” - Christian Herzog, Co-Founder, Modern Alchemists OG.

Vibes is the latest game to be released on the Windows platform for mobile and desktop. Players can solve challenging puzzles and listen to relaxing ambient music while doing so. The game is available as a paid application download from the Windows Store.

“We are happy to see more partners porting their apps to the Universal Windows Platform and joining in our success,” said Neil Leslie, General Manager, Developer Platform Evangelism at Microsoft Corp. “Users of the Vibes casual mobile and desktop game can expect more frequent updates thanks to this move to UWP.”

Vibes is using the UWP APIs to enable the same level of high-quality play experiences on mobiles and desktop devices alike. Furthermore, Vibes is using the Windows Store infrastructure for monetization, deployment of binary packages, and collection of user feedback.

Modern Alchemists is committed to developing high-quality apps and games for mobile and desktop environments.
